

Butter Pound Cake

Ingredients

1 lb butter or margarine
1 box powdered sugar (2 cups)
6 eggs
3 cups cake flour
1 Tbsp vanilla

Directions

Cream butter well and add sugar. Alternate eggs and flour (one egg at a time with a little flour). Mix well, don't overbeat, adding vanilla.

Lightly flour a bundt pan, do not grease. Bake in 350 degree oven for one hour and 15 minutes.

Might the Giles sisters be dreaming of some buttery pound cake that they could top with these luscious strawberries?
